Contents Volume 383

Special Issue in honor of Heydar Radjavi

R. Bhatia, M. Omladič, P. Rosenthal and P. Šemrl
A survey of Heydar Radjavi 1

B.R. Yahaghi
On irreducible semigroups of matrices with traces in a subfield. 17

M. Radjabalipour, P. Rosenthal and B.R. Yahaghi
Burnside's theorem for matrix rings over division rings 29

V. Lomonosov and P. Rosenthal
The simplest proof of Burnside's theorem on matrix algebras. 45

T. Ando
Sets of matrices with common Stein solutions and H-contractions . . 49

T. Sudo
Stable rank of C^*-algebras of type I. 65

E.W. Ellers
Conjugacy classes of involutions in the Lorentz group $\Omega(V)$ and in $SO(V)$ 77

F. Kittaneh
Norm inequalities for sums and differences of positive operators . . . 85

B.P. Duggal
Subspace gaps and range-kernel orthogonality of an elementary operator 93

M. Dobovišek
Simultaneous symmetrization 107

R. Drnovšek and T. Košir
Irreducible operator semigroups such that AB and BA are proportional 113

J. Bernik, R. Guralnick and M. Mastnak
Reduction theorems for groups of matrices. 119

H.-L. Gau and P.Y. Wu
Companion matrices: reducibility, numerical ranges and similarity to contractions. 127

R. Meshulam and P. Šemrl
Locally linearly dependent operators and reflexivity of operator spaces 143

Table of Contents continues

Table of Contents continued

Ch. Davis and A. Salemi
On polynomial numerical hulls of normal matrices 151
L. Livshits
On decomposability of periodic semigroups of non-negative matrices 163
X.-D. Zhang
The smallest eigenvalue for reversible Markov chains 175
D. Hadwin and E. Nordgren
A general view of multipliers and composition operators 187
D. Hadwin, J. Hou and H. Yousefi
Completely rank-nonincreasing linear maps on spaces of operators. . 213
M. Omladič
A variety of commuting triples 233
